

Rubber Speed Hump

Rubber 450mm / Product Description

Polite Urban Infrastructure's 450 mm rubber speed hump is an economical alternative to more expensive models. It is ideally suited to low traffic environments such as unit and townhouse developments, small car parks or for short term installations.

It is manufactured from a mixture of natural and recycled rubber. When laid in an alternating pattern it conforms to AS2890.1:2004. Polite Urban Infrastructure's rubber speed hump can also be used as a liquid bunding if installed with a sealant, e.g. Silastic.

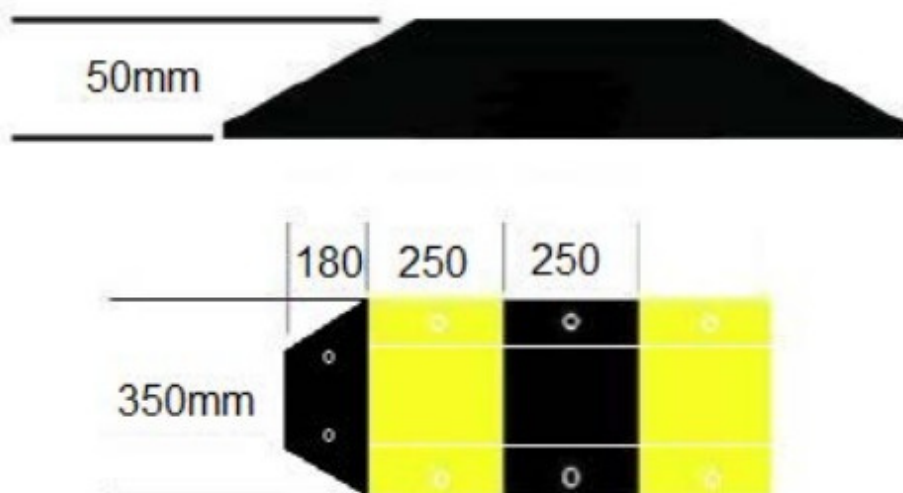

Key Features

- Designed to comply with AS2890.1:2004
- Stronger than any competitor's product
- Comes complete with all fixings
- Independent modules allow for easy removal and installation
- No rubber underlay required
- Accessible but concealed fixings
- Modules have a built-in bridge design to accommodate hoses or cables
