

URBAN FURNITURE & ACCESSORIES

The Promenade Seating Range

Simple Sophistication

The design of the promenade Range is distinguishable by its sleek curve on the legs. The seat and bench shown here are constructed from hot dipped galvanised steel, stainless-steel and powder coated finish, however, versions incorporating cast aluminium legs, aluminium RHS slats, timber slats and other materials are also available as we offer customisation options. In this range, bollards, bins and tree guards' options are also available to order.

The Esplanade Seating Range

Seating Range

Clean and Contemporary

The Esplanade Range has been designed to complement the modern lines of today's streetscape and shopping plaza developments. Both the seat and the bench have simple curved supports that can be set into the ground or bolted down. Options for the slats include wood and powder coated steel in a colour to suit your application. The bollard and bin surround are complemented with their notched and textured finishes. The seat and bench shown here are manufactured from mild steel which is hot dipped galvanised with a powder coated finish. Versions incorporating cast aluminium legs, aluminium RHS slats, timber slats and complete stainless-steel construction are also available.

The Melbourne Seating Range

Seating Range

Simple and Elegant

The Melbourne Range has been designed to offer a simple and elegant design which can suit a rural or city environment. Both the seat and the bench offer comfortable supports. This option includes wooden slats in brown colouring. However, customisation options are available on request. A selection of bollards and bin surrounds are also available to complement this set.

Tree Guards, Planters and Grates

Sandhurst

Hardware St

Promenade

Boulevard

Style and Function

Tree guards are a practical and stylish way to protect trees from animals and vandalism. Manufactured in mild steel and then hot dipped galvanised and powder coated, the tree guards can be customised to your streetscape colour scheme.

Made to measure

Utilising the precision of laser cutting technology, we can design and manufacture tree grates in almost any shape, size or pattern imaginable. Strength and durability are assured by using mild steel which is hot dipped galvanised and coated in bitumen paint after fabrication. All tree grates can be supplied as either two- or four-part units and come complete with a frame.

A growing concern

There are many styles and shapes of planters available in our extensive range or we can design and develop a customised product to suit your particular requirement. All mild steel body components are hot dipped galvanised prior to coating in the colour and finish that suits your environment.

Urban accessories

Litter Bin Surrounds

LitterBinSurrounds

We have designed and manufactured many of the litter bins that you see every day along shopping strips, in shopping centres and in public open spaces. The bin surrounds and entry lids shown here are just some examples of the designs we offer as customisation options are available when it comes to surround designs, covers, materials and finishes. We manufacture in mild steel, stainless-steel and aluminium with powder coated or polished custom designed and cut to suit perfectly any architectural features or environments. You may already have street furniture installed and are looking to maintain a specific style? We can advise you on the selection of a design or materials.

Bike Shelters

We specialise in the manufacture and installation of Bike Shelters & Compounds. We also offer customised bike shelter options to meet any of your requirement. To discover our bus shelters options, see our Bus Shelters Brochure.

Bollards

Safety Products

Bollards

Our extensive range of bollards will complement any style of streetscaping and architecture. They are manufactured in a variety of materials including corrosive free aluminium, heavy duty high strength steel and stainless-steel. They are painted using a UV resistant polyurethane powder coat to suit any colour.

All bollards are available as either inground or base plated with a removable option. The removable bollards can be locked into a sleeve by either a padlock or our key operated top locking device. For more design options, please see the bollard models present on our website. We also offer customisation options to meet any of your requirements.
